

WALLBOX

Corporate Facts

- Wallbox was founded in 2015 by Enric Asunción and Eduard Castañeda, who are now CEO and CTO respectively.
- Wallbox designs, manufactures and distributes innovative charging systems. The main aim is to accelerate the change into more sustainable ways of transportation by providing a comprehensive, simple and cost effective solution for the charging electric vehicles.
- Research, technical development, product testing and manufacturing take place in Barcelona, where Wallbox has strong engineering resource and capacity to produce 100,000 chargers per year.
- Software development, including support for the myWallbox charging management platform and post installation customer support is based in Madrid.
- The company is Spanish but the brand is international. Wallbox operations are solely conducted in English. The company workforce is 80-strong and growing quickly. Wallbox has sales operations in 30 markets, as far as China and New Zealand and cumulative sales are approaching 20,000 units.
- Wallbox has already collected prestigious awards. It has been judged as one of the world's most promising companies by the founders of LinkedIn, Netflix Siri, the CEO of Cisco and CIO of Tesla. And one of 'The 10 Fastest Growing EVs Solution Providers, 2018'.

- Major clients include national utilities and car companies.
- The company has a technology roadmap that takes in disruptive technologies such as public space wireless charging and DC home home charging. Wallbox software development already embraces voice recognition and command interpretation, cognitive leaning systems and artificial intelligence.
